CLINICAL NOTE

S - CHIEF COMPLAINT
Headache and fever since yesterday
S - HISTORY OF PRESENT ILLNESS
Patient presents with headache, fever, sore throat, and dry cough since yesterday, with minimal relief from Tylenol
A - ASSESSMENT
Mild infection, with slight increase in temperature, and symptoms of sore throat and cough, no previous clinical reports available for comparison, but current presentation suggests a new onset of illness
P - PLAN
Prescribed antibiotics and cough syrup, advised to rest, drink plenty of water, and get enough sleep, with a follow-up visit if fever doesn't subside within 3-4 days

AUDIO TRANSCRIPT (AI TRANSCRIBED)
How are you feeling today? I'm not feeling well, doctor. I've had a headache and fever since yesterday. I see. Do you also have a sore throat or cough? Yes. I've been coughing a little and my throat feels dry. Alright. Let me check your temperature. It's slightly high. Have you not had a cough? Are you taking any medicine yet? Just some Tylenol, but it didn't help much. Okay. It looks like a mild infection. I'll prescribe you some antibiotics and syrup for the cough. How long will it take to feel better? Usually within three to four days if you rest and take the medicine on time. Alright, I'll ... [Transcript continues - full version in digital records]
