Phone	1234566788	Clinician	Dr. Mubs
Aadhaar	-	Org	PCMC

VITAL SIGNS (Auto-Extracted by AI from Clinical Reports)

Blood Pressure 148/94 mmHg	Pulse Rate 92 bpm	Blood Glucose 132.0 mg/dL
-------------------------------	----------------------	------------------------------

CLINICAL NOTE

PRESENTATION

Patient presents with a persistent cough for two days, unresponsive to medication, with a history of mild chest discomfort, occasional headaches, fatigue, and shortness of breath.

VITALS (FROM NOTE)

Previous report: Blood Pressure 148/94 mmHg, Heart Rate 92 bpm, Blood Sugar (Fasting) 132 mg/dL, Cholesterol mildly elevated. Current report: No new vitals available.

INVESTIGATIONS

Previous ECG showed no acute abnormalities but mild stress-related tachycardia. Current investigations: None available.

TREATMENT PLAN

Previous plan: Low sodium diet, daily 30-minute walks, reduced caffeine intake, mild antihypertensive medication, and follow-up after 3 months. Current plan: Requires reassessment considering the new symptom of persistent cough, potentially indicating a need for updated medication, further investigations, or a revised management plan.

AUDIO TRANSCRIPT (AI TRANSCRIBED)

Hello doctor, I have had a cough for two days, and then I have a cough. No matter what medicine I take, it doesn't get better.
