VITAL SIGNS (Auto-Extracted by AI from Clinical Reports)

Blood Pressure

148/94 mmHg

Pulse Rate

92 bpm

Blood Glucose

132.0 mg/dL

CLINICAL NOTE

S - CHIEF COMPLAINT

Headache and sore throat

S - HISTORY OF PRESENT ILLNESS

Patient reports having a headache and sore throat for three days, with a low-grade fever mostly at night, and is currently taking painkillers

A - ASSESSMENT

Acute viral pharyngitis is suspected given the symptoms of headache, sore throat, and low-grade fever. Compared to the previous visit, the patient's current symptoms do not appear to be directly related to the previously noted mild hypertension or borderline type 2 diabetes risk. However, the patient's current condition may be exacerbated by the lack of adherence to the previously recommended lifestyle modifications, such as a low sodium diet and daily walking. The patient's symptoms have shifted from mild chest discomfort and fatigue to respiratory symptoms, which may indicate a new or unrelated condition

P - PLAN

Prescribe antipyretics and analgesics for symptom management, advise rest for at least three to five days, and encourage the patient to drink warm fluids and adhere to the medication regimen. A follow-up visit is recommended to reassess the patient's condition and evaluate the effectiveness of the current treatment plan. Additionally, the patient should be reminded to follow the previously recommended lifestyle modifications to manage their chronic conditions

AUDIO TRANSCRIPT (AI TRANSCRIBED)

How are you feeling today?
Good morning, doctor. I'm not feeling well.
I see. What seems to be the problem?

SOAP CLINICAL NOTE

I have a headache and a sore throat.

How long have you had these symptoms?

For about three days.

Do you have a fever?

Yes, a little, mostly at night.

Okay. Are you taking any medicine right now?

Just some painkillers, but... but they don't know much.

I understand.

Do you have any allergies?

No, I don't.

Alright. I'll give you some medicine and advise rest.

Thank you, doctor. How many days should I rest?

At least three to five days. Drink warm fluids and take the medicine on time.

Good mo
